KEZAVA™ Product of Synaptris

Kezava On-Call Management System

Health systems face significant challenges with on-call provider scheduling, impacting coverage, communication, patient outcomes, and provider satisfaction. Efficient scheduling is crucial for maximizing patient access, maintaining high care standards, retaining providers, and ensuring smooth workflow operations.

With Kezava On-Call Management System, your administrators have instant access to your provider schedules. With features like real-time updates and automatic notifications, everyone is always up to date on their on-call schedule.

Features

- The Kezava on call assignment algorithm automatically creates call assignments to match the providers availability, preferred call days and contracted on call service hours.
- Initiate and approve schedule changes, call swap and covering provider requests in real-time and notify the administrator and providers instantly via notification.
- Access on-call calendars from anywhere. Everyone has visibility on who is on call and when.
- Stay updated with on-call schedule with automatic notification and reminder features.

Benefits

- Improved patient care, access, and outcomes
- Increased workforce productivity
- Higher rates of provider satisfaction
- Improved communication between providers and staff
- Increased operational workflow efficiency
